End-2-End Market Data Governance with BRISKEN MAKET DATA HUB

SAP Business Technology Platform Service by Brisken

Market Data Hub

Out-of-the-box integration to SAP

Bring in data from various sources such as Bloomberg, Reuters, OANDA, 360T, Central Banks, etc.
Automatically distribute the data to any application in your system landscape, including SAP ECC and S/4HANA, without any coding.

Reuters Integration
There are pending changes to save

Add Step

Schedule → Get Reuters → Map SAP → Post SAP

1 Flexible Configuration

With a workflow designer tool and data model builder, you can define your own integration process and data structures to meet your business requirements and support all kinds of external and internal (market) data.

2 Integration Monitoring

Get notified by email when your integration process fails and get a detailed log report to solve any integration issue as soon as it happens.

3 No Infrastructure Management

Running on SAP Business Technology Platform the Market Data Hub is provided as a SaaS solution. The service can be up and running in no time, without any complex infrastructure deployment.

Market Data Hub – The Benefits

Reduce Operational Risk in Operating Market Data

Level up the quality of your market data, reduce operational risks and avoid financial restatements through a complete set of data governance tools.

01. Consistency

The market data hub acts as the single source of truth for market data across your entire organization.

02. Quality

Be notified by the anomaly detection system, approve or adjust the data with a flow-based exception handling process.
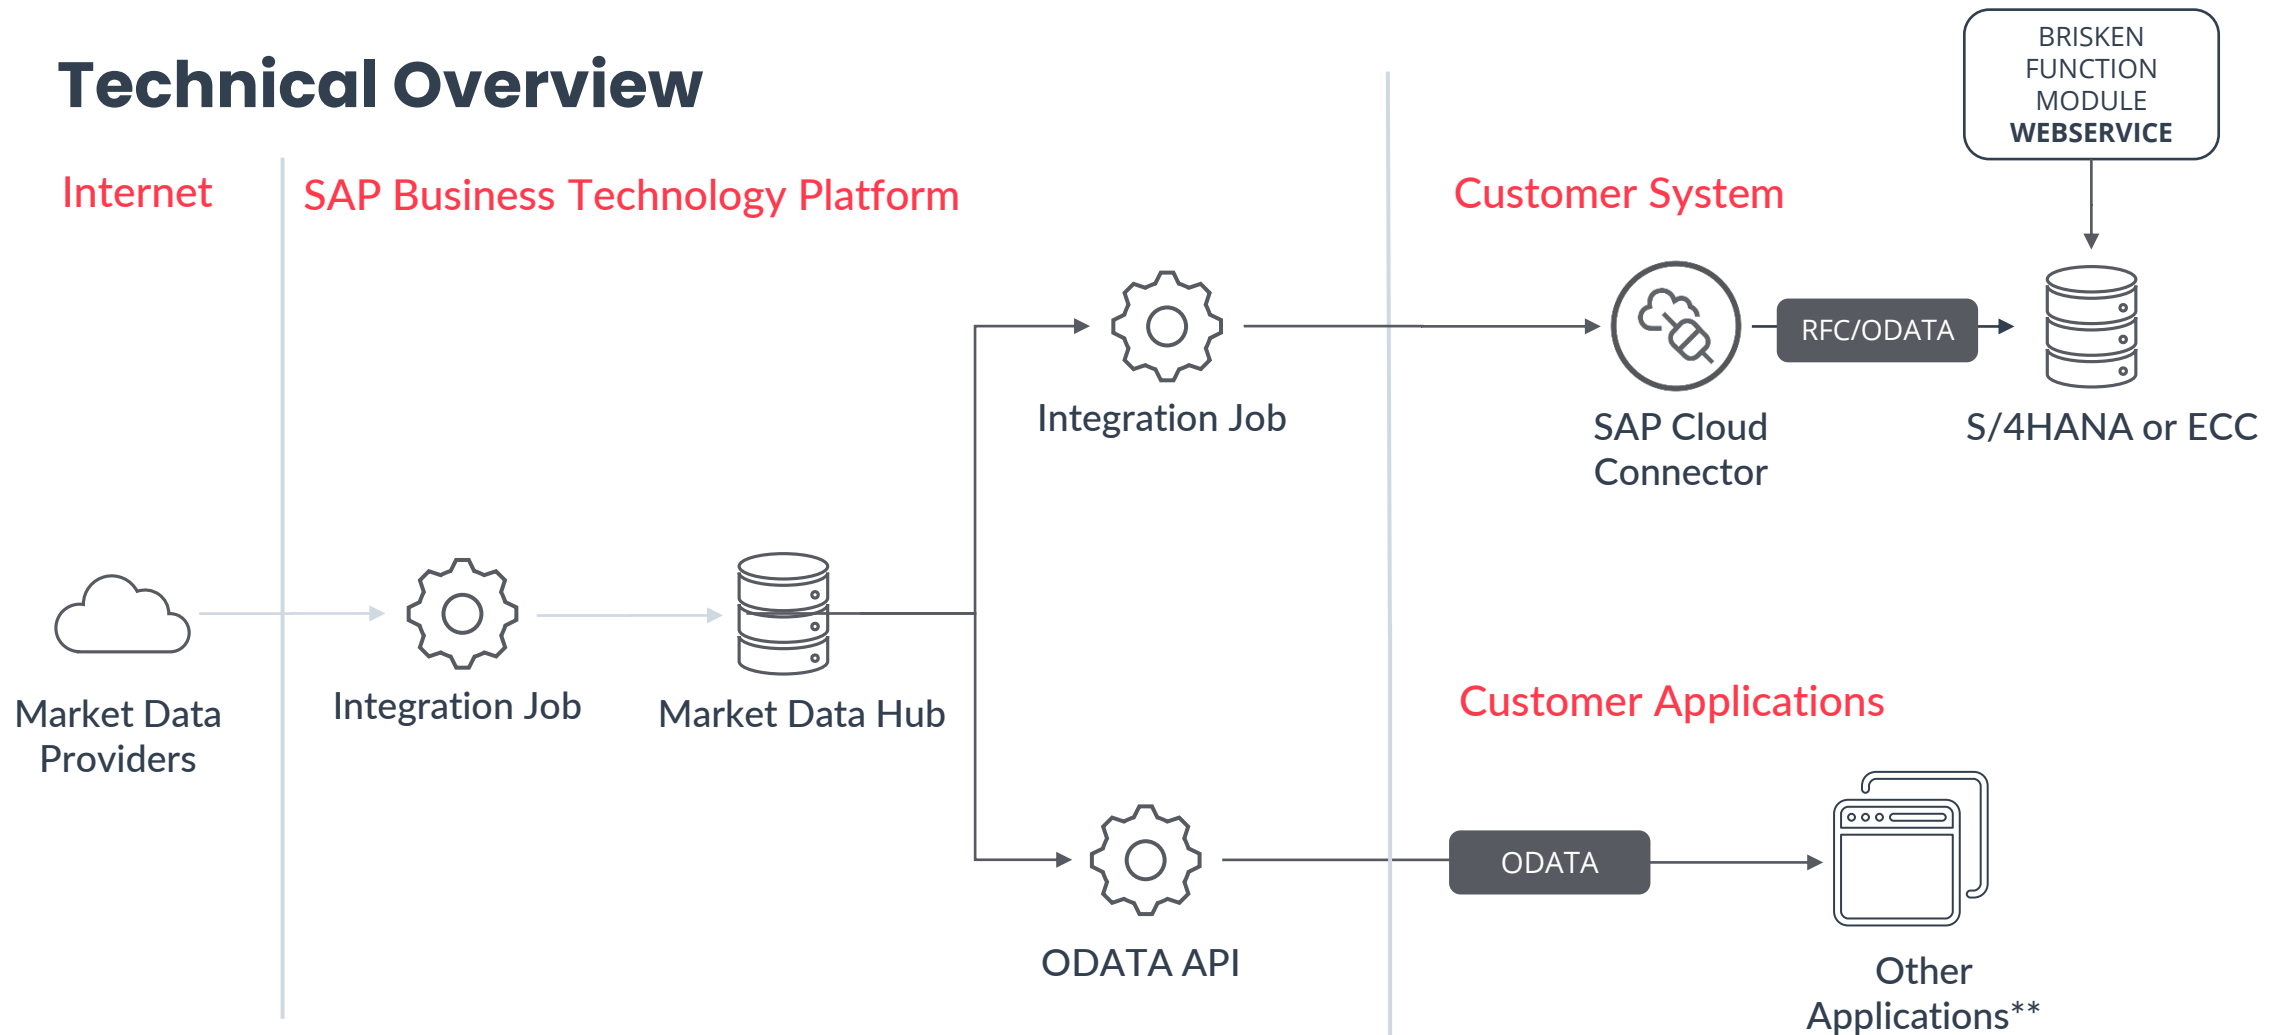

03. Compliance

Define your own flow-based process to approve manual data entries, including maker-checker validation, and reduce the risk of rate inconsistencies.

04. Auditing

Have a 360-degree view of all changes made to your market data, including full audit logs for integration jobs, manual data entries, configuration changes and approvals.
