Introduction to SAP Integration Suite API Management

Manage the lifecycle of APIs in the Cloud

APIs are digital building blocks for **modern apps** and **open integrations**. API Management supports **full-lifecycle management** of your APIs

Design

Design your APIs based on open standards like Open API specification and OData

Develop

Develop your APIs by exposing and composing backend interfaces from apps or middleware

Manage

Protect your APIs from security threats, manage traffic, cache your data on the edge with 40+ in-built policies

Monitor

Monitor and analyze your API usage, performance and errors

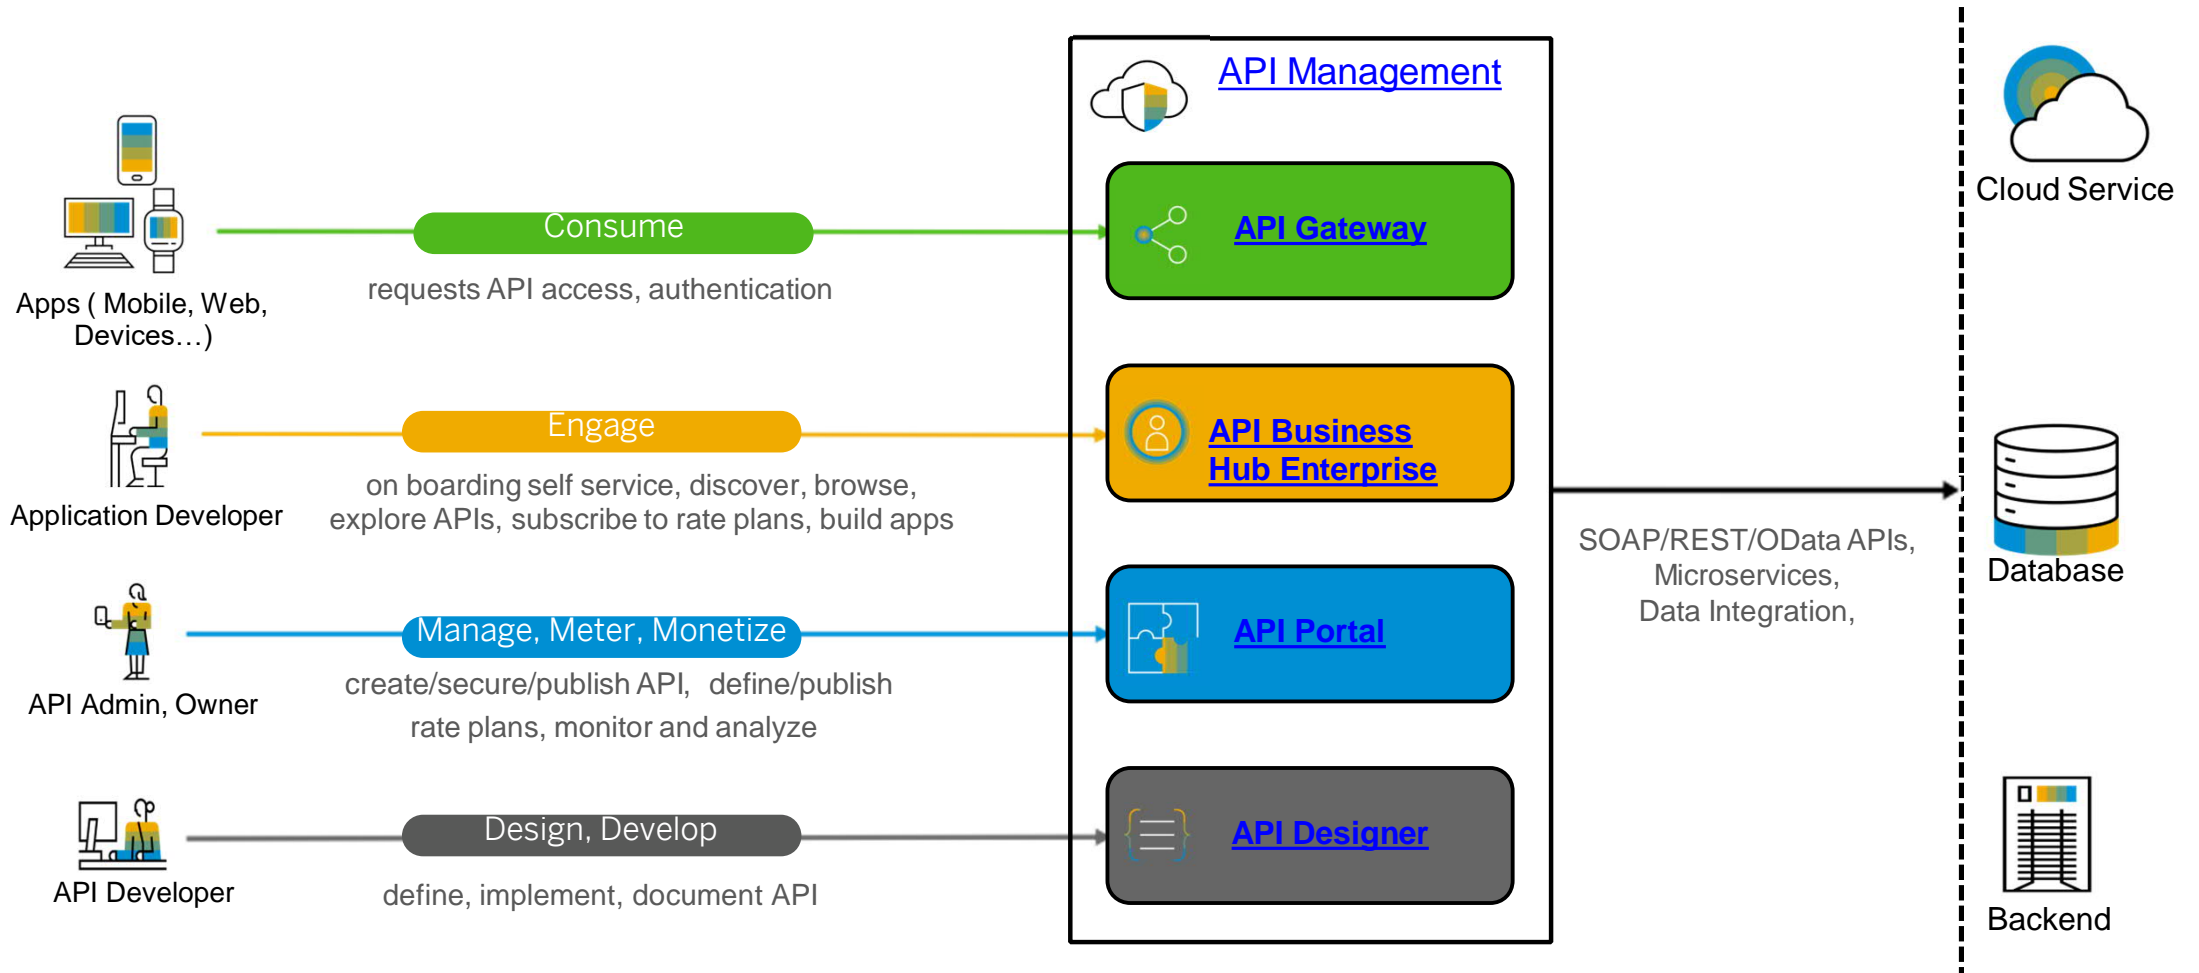

Engage

Engage with application developers and monetize your digital assets through APIs

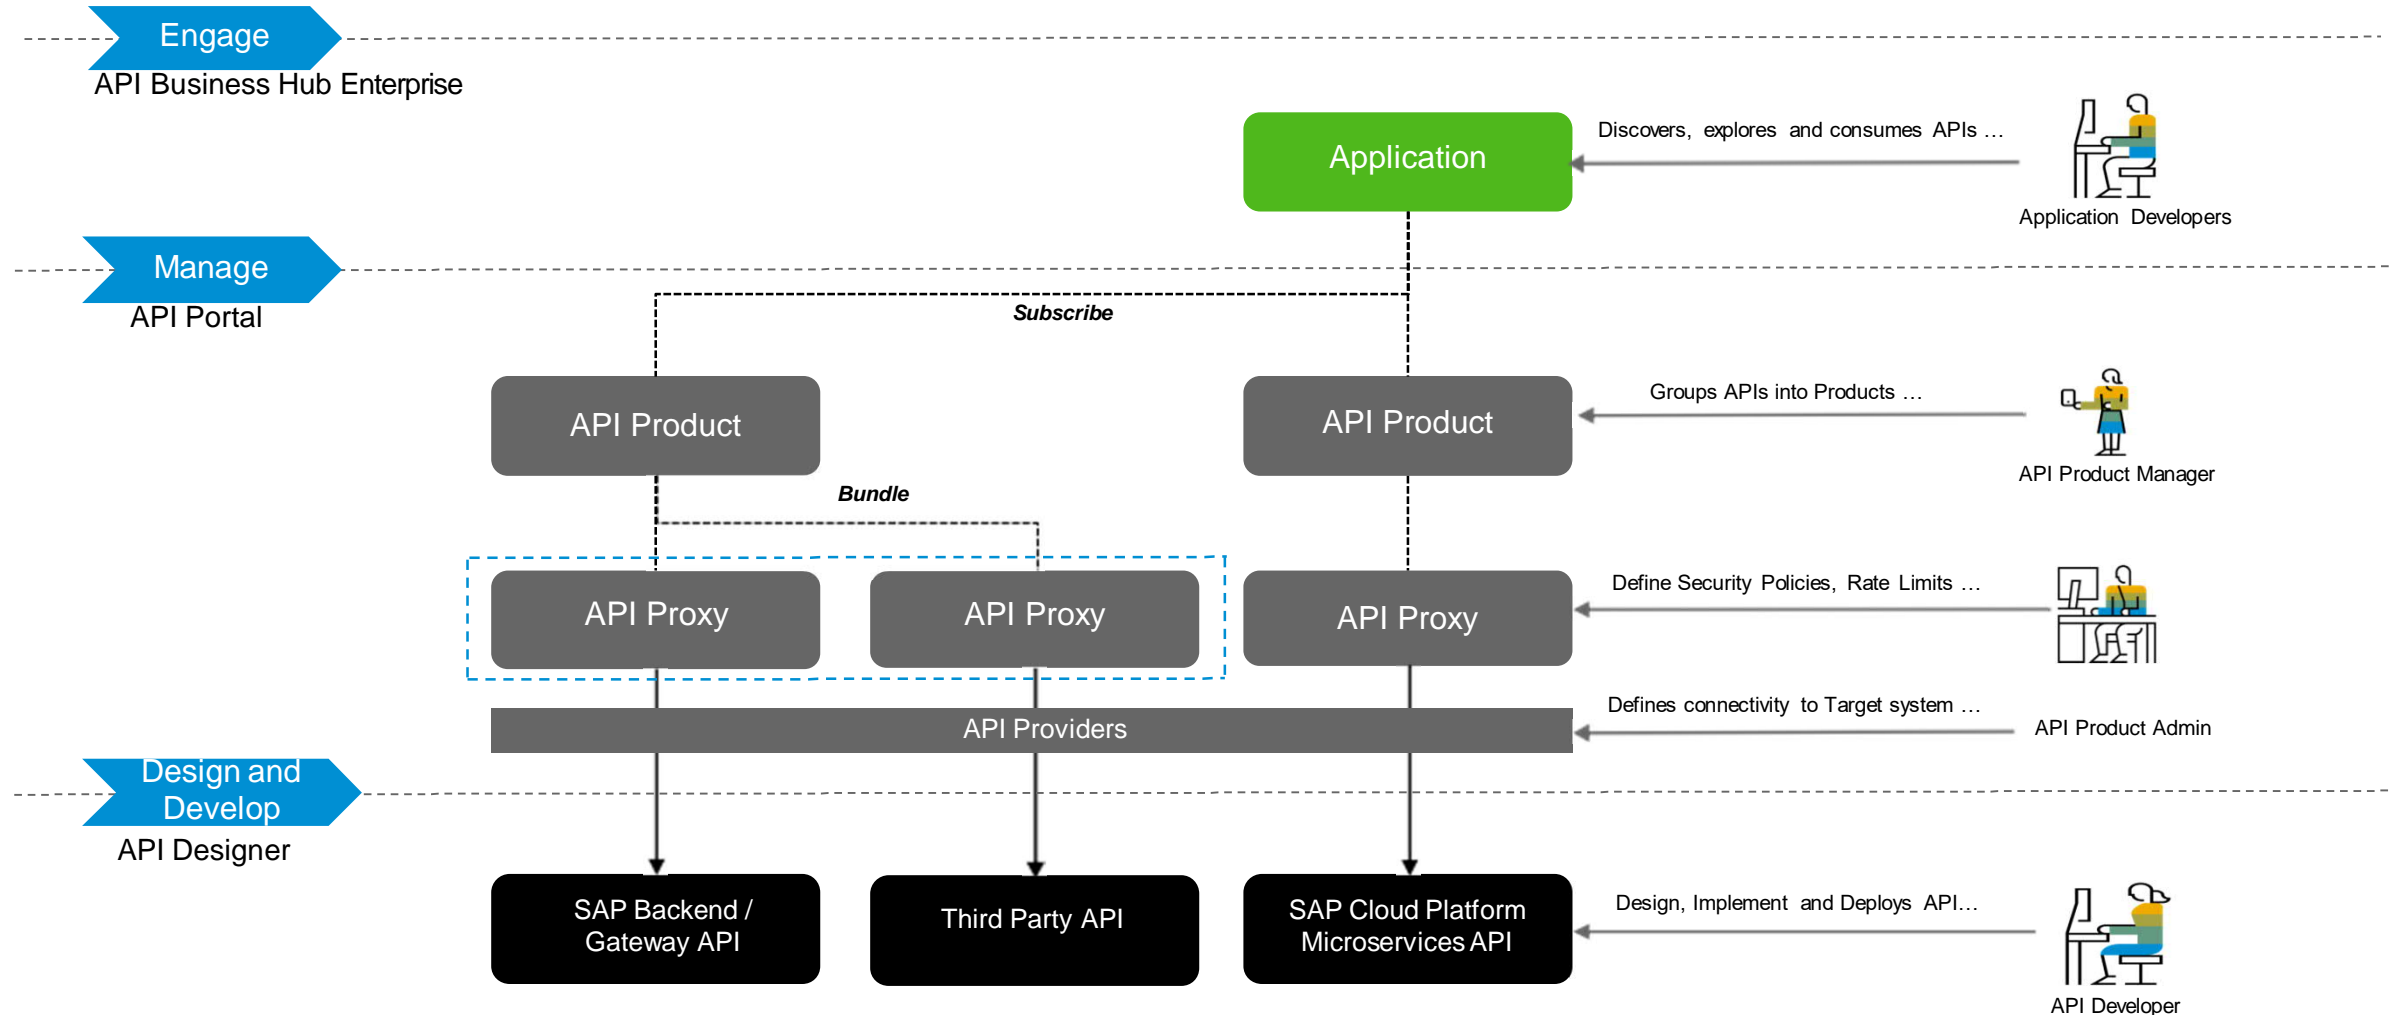

Introduction to SAP Integration Suite API Management

Key components and Interaction Flows
