# Automate your Accounts Payable processing with **Intelligent Invoice Express**

AP automation should be for all suppliers, not just some. Many solutions focus primarily on 'strategic' suppliers and offer no solution for the normally long tail of 'transactional' suppliers. This results in only solving for part of the problem, leaving Accounts Payable still working with paper, fax, PDF and email.

Total spend (by supplier)

Typically on a supplier network

Unlikely to be on a supplier network
Opportunity for IIE automation

80% of spend
Strategically managed spend

20% of spend
Tail spend

Number of suppliers

Intelligent Invoice Express (IIE) is a simple and time-saving application, enabling suppliers to directly submit invoices for faster, seamless processing. Invoices will not be lost or misplaced and are safely registered with your AP function, without any manual handling, for immediate processing and accurate, controlled posting into your APsystem.

Five reasons to use **Intelligent Invoice Express**

Reduce your manual invoice processing
No paper or portal submissions required, as suppliers simply email invoices or send a cXML payload

Touchless invoice posting capability
Powerful built in automation means more accurate and faster entry of invoices

Control and simplify invoice handling
Never lose an invoice and gain quick benefits from e-invoicing to standardize your process

Fast benefits for you and your suppliers
Easy for suppliers, with reduced effort and cost for your supplier onboarding

Simple and fast deployment
The app can be up and running 48 hours after initial assessment of relevant invoices
